I have been actively studying and working in the field of front-end development for more than a year and a half. I am proficient in HTML5, CSS3, SASS, JavaScript (ES6+), and TypeScript. I also have experience with Git and Gulp, which helps me to effectively manage development processes and automate routine tasks. In the near future, I plan to expand my skills by focusing on learning React to create even more dynamic and interactive web applications.

I am always eager to learn new technologies and improve my skills to stay up-to-date with current web development trends. For me, attention to detail is extremely important, especially when working with the user interface, in order to create products that not only work, but also bring a pleasant experience to end users.

I am convinced that continuous development and teamwork are the keys to success in IT. I look forward to joining a team where I can apply my knowledge and skills in practice, as well as gain new experience that will allow me to grow as a professional."

I'm from the Armed Forces of Ukraine (no need to reservation me!) ЗСУ

HARD SKILLS

JavaScript   jQuery   Bootstrap   Microsoft Visual Studio

Layout of adaptive and cross-browser sites of different complexity using HTML5, CSS3, jQuery and Javascript.

Refactoring existing code

PROJECTS

gidrotsikly

Responsive ECommerce Sites on 3 pages

https://github.com/diimas666/gidrotsikly

Technologies: HTML, CSS, Jquery, JavaScript, plugins: slickSlider, rangeSlider, rateyo.
Bento

This website is built with HTML, CSS, and JavaScript, featuring smooth animations, component-based design, and WebP-optimized images for fast loading. The site is fully responsive, ensuring a great user experience on any device, with SEO and performance optimization. It highlights modern web technologies and best practices for cross-browser compatibility and mobile-first design.

https://github.com/diimas666/Bento

Dr Gomes (medical Site)

This is a 12-page website for a plastic surgeon, built with HTML, CSS, and JavaScript. It features animated transitions, scroll-triggered event handlers, and a form submission system. The site is fully responsive, optimized for all devices, and includes compressed images in WebP format for faster loading. The design incorporates multiple sliders to showcase the surgeon's work and services. The project was deployed on a live hosting server, ensuring seamless user experience with smooth scrolling animations and interaction features.

https://gomes.com.ua/

Technologies: HTML, CSS, and JavaScript. Gulp, GitHub
constructTemplate

One of my early practice projects, focused on the desktop version. The site was built using HTML, CSS, and JavaScript. While functional, some layout issues were encountered in certain sections. This project is included in my portfolio to demonstrate my progress and add to my experience.

https://diimas666.github.io/constructTemplate/

Technologies: HTML, CSS
CREATE

A fully responsive website developed for an advertising company, featuring smooth animations and interactive elements. Built using HTML, CSS, and JavaScript, the site is optimized for all devices, providing an engaging user experience with clean, modern design
(One of My First Projects)

https://diimas666.github.io/CREATE/

askExpert seo site

One of My First Projects

This was one of my early projects, created using HTML, CSS, and JavaScript. It helped me build a strong foundation in web development. While simple, the project showcases basic functionality and design, serving as a stepping stone in my learning journey.

https://diimas666.github.io/askExpert/

Technologies: HTML, CSS, and JavaScript (Adaptive)
Dashboard / page

social networking , sublists. This project focused on page layout, built with HTML and CSS. The goal was to create a clean, structured design with a focus on responsiveness and user-friendly interface. It demonstrates my ability to implement precise layouts and manage the overall structure of web content.
